

My name is Mat Cooke; I am a data warehouse developer for the NHS. I have 2 children at secondary school; both of whom attended The Milford Academy. My interests are I.T. and live sound engineering at the church in which I am an active member. It is my passion for Clifton to see children realise their full potential. My vision is to see children in Clifton feeling empowered to aspire to careers that historically would have been seen to be unavailable to them It is my fervent belief that The Milford Academy can help children to see this and be equipped to pursue whatever career they desire
